DETAILED ACTION

Specification

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (I) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: The headings should not be in bold type or underlined. Appropriate correction is required.

Application/Control Number: 10/789,346 Page 3

Art Unit: 3725

Drawings

- 2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Figure 1, reference item 20. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- 3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the second threaded stud attachable to the nose of the housing of the pneumatic hammer must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

Page 4

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 6-14 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claim 6, there is no clear disclosure for both a first and a second threaded stud in the attachment nose portion such that one of ordinary skill in the art could make and/or use the claimed invention.

Regarding claims 7-14, there is insufficient disclosure for the operation of the incremental pull distance adjustment means including a selectively movable depth slider

Art Unit: 3725

such that one of ordinary skill in the art could make and/or use the claimed invention without undue experimentation analysis. The disclosed specifications on page 6, lines 17-22 and page 7, lines 1- 2 are insufficient to enable one skilled in the art to make and/or use the invention.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the nose" in the fourth paragraph of the claim.

There is no antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 rejected under 35 U.S.C. 102(b) as being anticipated by Kemnitz et al. (US Patent 4,495,791). Kermnitz et al. discloses a "dent removing pneumatic puller" (title) with "structural housing" 13 (column 2, lines 6-8), "a handle" 90 (column 4, lines 11-12), a "piston control means" 62 (column 5, line 5) which is used for triggering the

Art Unit: 3725

invention manually, "a gas connection" 55 (column 3, line 25) for interconnecting the housing to a pressurized flow of air, and "a hardened tool steel point" 21 (column 2, line 19) "with threads" 22 (column 2, line 20).

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 8. Claim 2 -5 rejected under 35 U.S.C. 103(a) as being unpatentable over Kemnitz et al. in view of Chartier (US Patent 3,030,837). The claims differ from Kemnitz et al. in calling for the threaded member to be replaceable on the nose of the housing. Chartier, however, discloses a "dent-removing hand tool" (title) with "variations" or different "embodiments" (column 2, lines 34- 43) wherein these threaded members are replaceable.

Application/Control Number: 10/789,346

Art Unit: 3725

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to manufacture the pneumatic puller of Kemnitz et al. with replaceable threaded members in view of the teachings of Chartier to allow for quick and easy handling for the removal of dents with minimum body effort and to provide a tool that is effective in operation and long wearing in use and "to permit easy

Page 7

9. Regarding claim 3, Chartier also teaches a u-shaped tool for attachment to the threaded member to be hooked onto the dented part (Figure 4).

replacement of the working parts" (Chartier, column 1, lines 42-43):

Regarding claim 4, Chartier also teaches a right-angled tool for attachment to the threaded member to be hooked onto the dented part (Figure 5).

Regarding claim 5, Chartier also teaches a u-shaped tool including a first threaded stud attachable (Figure 4, reference item 4).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to include a u-shaped and a right-angled tool for attachment to the threaded member to make it possible for the operator to access and repair dents in door panels, fenders, etc. that are often enclosed "and further provide a versatile tool adaptable for use in various types of body work" (Chartier, column 1, lines 43-45).

Application/Control Number: 10/789,346

Art Unit: 3725

Allowable Subject Matter

- 10. Claim 6 and 10-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
- 11. Claim 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

- 12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 4,073,181 patentee Steinmann, Jr. issued on Feb. 14, 1978 and US Patent 3,922,902 patentee Jarman issued on Dec. 2, 1975 are further shown the state of the art.
- 13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa M. Bonk whose telephone number is (571) 272-1901. The examiner can normally be reached on M-F 7:30AM 5PM with alternating Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on (571) 272-4419. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
